Dear SAS Honors Program Students,

We’re at the point in the semester where, dangerously, motivation begins to drop while the workload shoots way up. I know the end of the semester is near and all you want to do is put your feet up and bask in the sun, but, there’s a difference between discipline and motivation. So with motivation down, start applying that portion of your brain that can hold strong without immediate reward. Brace yourself and sprint to the finish!

Jumpstart the brain at some of these upcoming events. Hear some of the incredible presentations from our seniors at the SAS Interdisciplinary Research Conference. Learn about one of the most monumental court cases of the decade at The Trial of Derek Chauvin for the Killing of George Floyd: A Panel Discussion. Rutgers is doing a lot to make campus more sustainable: whether or not they could do more is not something I’m in a position to say right now. Regardless, advocate for and learn all about future plans for campus sustainability at the upcoming Climate Task Force Town Hall. Read all about the #honorsfamous Anny Lu in our most recent Senior Spotlight. Learn more about the benefits in place for commuters by checking out the RCSA Resources.

Warm Regards,
