A NEW LOOK
RUTGERS SASHP NEWSLETTER

Wednesday, May 3, 2023
Dear SAS Honors Program Students,

Surprise! I am sure this newsletter caught many of you off guard. You might have done a double take and had to check the sender or wondered if you’d accidentally subscribed to an unwanted mailing list. Don’t worry, this is still the SASHP Newsletter. It’s just had some remodeling done, a makeover if you will. Perhaps some of you are sad to see the old design go, having formed an attachment to it due to the years of newsletters sent in that format. I completely understand how you feel. I form attachments as fast as tan lines under a blistering, summer sun (Yes, I realize that it’s unhealthy). However, change can also be good. Take butterflies, for example, those beautiful winged creatures. They wouldn’t exist without change. And what better time than now, in the heart of spring, the season of change? I’m sure many of us are undergoing changes, heterogeneous buds finishing one year of college and either preparing for the next or readying to bloom and venture off into the real-world. It is never easy to bid farewell—to friends, professors, deans, a place that has temporarily become home—but sometimes, you have to lose something in order to rebuild it even stronger. What this means for the newsletter is that, with a new voice behind the page, a new look is due to match.

The semester is quickly coming to a close, but don’t miss out on these opportunities! Read about the May Honors Alumni Spotlight! Apply to be a Math Teaching Fellow!

Warmest Regards,
Halima Niazi
Your (new) Newsletter Editor

IN THIS ISSUE:

HONORS ALUMNI SPOTLIGHT: MIRIAM LISCI

MATH TEACHING FELLOWS WANTED: SUMMER 2023

HAVE A WONDERFUL BREAK AND SEE EVERYONE BACK IN THE FALL!
EVENTS/ANNOUNCEMENTS

Honors Alumni Spotlight: Miriam Lisci

The May spotlight is on Miriam Lisci! Miriam graduated with the Rutgers School of Arts and Sciences class of '16 with a major in genetics and minor in criminology. After university, Miriam continued her studies and obtained a master’s degree and a PhD at the University of Cambridge. She currently works as a postdoctoral researcher in the Department of Immunobiology at the University of Lausanne in Switzerland. "Multifaceted. Intense. Eye-opening" are the words she uses to describe her experience at Rutgers and with the Honors Program. Read the full spotlight here!

Math Teaching Fellows Wanted: Summer 2023

The School of Environmental and Biological Sciences is currently accepting applications for two Math Teaching Fellows for this summer. Fellows will plan academic lessons, quizzes, and exam reviews and learn how to maintain an effective learning environment. Housing is available for the position. The application is open until positions are filled, so apply ASAP using this link!

Have a Wonderful Break!
